D

During the rosy years of elementary school (小学), I enjoyed sharing my dolls and jokes, which allowed me to keep my high social status. I was the queen of the playground. Then came my tweens and teens, and mean girls and cool kids. They rose in the ranks not by being friendly but by smoking cigarettes, breaking rules and playing jokes on others, among whom I soon found myself.

Popularity is a well-explored subject in social psychology. Mitch Prinstein, a professor of clinical psychology sorts the popular into two categories: the likable and the status seekers. The likables' plays-well-with-others qualities strengthen schoolyard friendships, jump-start interpersonal skills and, when tapped early, are employed ever after in life and work. Then there's the kind of popularity that appears in adolescence: status born of power and even dishonorable behavior.

Enviably as the cool kids may have seemed, Dr. Prinstein's studies show unpleasant consequences. Those who were highest in status in high school, as well as those least liked in elementary school, are "most likely to engage (从事) in dangerous and risky behavior."

In one study, Dr. Prinstein examined the two types of popularity in 235 adolescents, scoring the least liked, the most liked and the highest in status based on student surveys (调查研究). "We found that the least well-liked teens had become more aggressive over time toward their classmates. But so had those who were high in status. It clearly showed that while likability can lead to healthy adjustment, high status has just the opposite effect on us."

Dr. Prinstein has also found that the qualities that made the neighbors want you on a play date – sharing, kindness, openness – carry over to later years and make you better able to relate and connect with others.

In analyzing his and other research, Dr. Prinstein came to another conclusion: Not only is likability related to positive life outcomes, but it is also responsible for those outcomes, too. "Being liked creates opportunities for learning and for new kinds of life experiences that help somebody gain an advantage," he said.

32. What sort of girl was the author in her early years of elementary school?

- A. Unkind. B. Lonely. C. Generous. D. Cool.

33. What is the second paragraph mainly about?

- A. The classification of the popular. B. The characteristics of adolescents.
C. The importance of interpersonal skills. D. The causes of dishonorable behavior.

34. What did Dr. Prinstein's study find about the most liked kids?

- A. They appeared to be aggressive. B. They tended to be more adaptable.
C. They enjoyed the highest status. D. They performed well academically.

35. What is the best title for the text?

- A. Be Nice – You Won't Finish Last
- B. The Higher the Status, the Better
- C. Be the Best – You Can Make It
- D. More Self-Control, Less Aggressiveness

第二节 (共 5 小题; 每小题 2 分, 满分 10 分)

根据短文内容, 从短文后的选项中选出能填入空白处的最佳选项。选项中有两项为多余选项。

Is Fresh Air Really Good for You?

We all grew up hearing people tell us to “go out and get some fresh air.” 36
According to recent studies, the answer is a big YES, if the air quality in your camping area is good.

37 If the air you're breathing is clean – which it would be if you're away from the smog of cities – then the air is filled with life-giving, energizing oxygen. If you exercise out of doors, your body will learn to breathe more deeply, allowing even more oxygen to get to your muscles (肌肉) and your brain.

Recently, people have begun studying the connection between the natural world and healing (治愈). 38 In these places patients can go to be near nature during their recovery. It turns out that just looking at green, growing things can reduce stress, lower blood pressure, and put people into a better mood (情绪). Greenery is good for us. Hospital patients who see tree branches out their window are likely to recover at a faster rate than patients who see buildings or sky instead. 39 It gives us a great feeling of peace.

40 While the sun's rays can age and harm our skin, they also give us beneficial Vitamin D. To make sure you get enough Vitamin D – but still protect your skin – put on sunscreen right as you head outside. It takes sunscreen about fifteen minutes to start working, and that's plenty of time for your skin to absorb a day's worth of Vitamin D.

- A. Fresh air cleans our lungs.
- B. So what are you waiting for?
- C. Being in nature refreshes us.
- D. Another side benefit of getting fresh air is sunlight.
- E. But is fresh air really as good for you as your mother always said?
- F. Just as importantly, we tend to associate fresh air with health care.
- G. All across the country, recovery centers have begun building Healing Gardens.

第三部分 语言知识运用 (共两节, 满分 45 分)

阅读下面短文, 从短文后各题所给的 A、B、C 和 D 四个选项中, 选出可以填入空白处的最佳选项。

Every year about 40,000 people attempt to climb Kilimanjaro, the highest mountain in Africa. They 41 with them lots of waste. The 42 might damage the beauty of the place. The glaciers (冰川) are disappearing, changing the 43 of Kilimanjaro.

Hearing these stories, I'm 44 about the place – other destinations are described as “purer” natural experiences.

However, I soon 45 that much has changed since the days of disturbing reports of 46 among tons of rubbish. I find a 47 mountain, with toilets at camps and along the paths. The environmental challenges are 48 but the efforts made by the Tanzania National Park Authority seem to be 49.

The best of a Kilimanjaro 50, in my opinion, isn't reaching the top. Mountains are 51 as spiritual places by many cultures. This 52 is especially evident on Kilimanjaro as 53 go through five ecosystems (生态系统) in the space of a few kilometers. At the base is a rainforest. It ends abruptly at 3,000 meters, 54 lands of low growing plants. Further up, the weather 55 – low clouds envelope the mountainsides, which are covered with thick grass. I 56 twelve shades of green from where I stand. Above 4,000 meters is the highland 57: gravel (砾石), stones and rocks. 58 you climb into an arctic-like zone with 59 snow and the glaciers that may soon disappear.

Does Kilimanjaro 60 its reputation as a crowded mountain with lines of tourists ruining the atmosphere of peace? I found the opposite to be true.

阅读下面短文, 在空白处填入 1 个适当的单词或括号内单词的正确形式。

The polar bear is found in the Arctic Circle and some big land masses as far south as Newfoundland. While they are rare north of 88°, there is evidence 61 they range all the way across the Arctic, and as far south as James Bay in Canada. It is difficult to figure out a global population of polar bears as much of the range has been 62 (poor) studied; however, biologists calculate that there are about 20,000-25,000 polar bears worldwide.

Modern methods 63 tracking polar bear populations have been employed only since the mid-1980s, and are expensive 64 (perform) consistently over a large area. In recent years some Inuit people in Nunavut 65 (report) increases in bear sightings around human settlements, leading to a 66 (believe) that populations are increasing. Scientists have responded by 67 (note) that hungry bears may be congregating (聚集) around human settlements, leading to the illusion (错觉) that populations are 68 (high) than they actually are. Of 69 nineteen recognized polar bear subpopulations, three are declining, six 70 (be) stable, one is increasing, and nine lack enough data.
